Programming	Javascript, Typescript, React, Express, Next.js, Node.js
Database	MySQL, Firestore, Mongodb
Other	Unit test, distributed library, design system, rest API

WORK EXPERIENCE

PadiUMKM — **South Jakarta** (WFH)
Frontend developer — *Aug 2024 - Present*

- Designed and implemented isolated chat apps.
- Lead the development process to ensure the sustainability, accessibility, and cohesion of the messaging application across diverse product lines.
- Successfully implemented a proof of concept for OpenAPI and a developer dashboard, enhancing B2B integration capabilities and contributing to the seamless execution of collaborative projects.
- Tech stack: React, Firebase, Express, Next.js

Metanesia — **South Jakarta** (WFH)
Frontend developer — *Dec 2022 - Aug 2023*

- Played a key role in facilitating the merger of Smarteye and Metanesia teams, providing crucial support to the CEO in navigating and orchestrating the integration process.
- Implemented standardized code conventions across the entire team, fostering consistency and efficiency. Oversaw the expansion of the frontend development team from 4 to 6 members.
- Led the development of a Metaverse CMS platform, showcasing proficiency in designing and building innovative solutions for advanced virtual environments.
- Tech stack: Typescript, Three.js, React, Unity WebGL

Smarteye — **Central Jakarta** (WFH during covid)
Frontend developer — *Feb 2019 - Dec 2022*

- Conducted in-depth research and spearheaded the development of an immersive 3D web tour, showcasing a commitment to innovative solutions and cutting-edge technologies
- Engineered a comprehensive React Design System, leveraging expertise in front-end development to create a versatile and cohesive framework for seamless user interface implementation.
- Developed a zero-config tool to expedite project delivery.
- Established an SEO-friendly landing page with a user-centric approach, specializing in boosting lead generation. Implemented a headless CMS strategy utilizing WordPress and incorporated automation to construct optimized content.
- Tech stack: Typescript, Three.js, Next.js, Storybook

Karirlab — **Remote**
Frontend developer freelance — *Oct 2021 - Dec 2022*

- Implemented design-to-code process for a resume builder platform, ensuring seamless translation of creative concepts into functional user-friendly solutions.
- Contributed to the successful release of the company's initial product stage
- Tech stack: Typescript, Next.js, SASS

EDUCATION

Esa Unggul University **West Jakarta**

Bachelor's Degree in Informatics Engineering *Graduated Aug 2021*

- GPA: 3.44/4.00. Final Thesis: development of web-based content management application for virtual tour using MERN stack technology
